

The Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear The Federal Communications Commission,

I feel like we are already having to pay enough for someone else to charge us to use something that belongs to us, (the air) and I think that the Government, FCC, or anyone else should be aloud to make us pay any more for something that belongs to us. Because I live on a fixed Income thanks to some Doctors who already have enough money too buy and pay for celluar phone services and I feel like that because I don't have theirs, and your large quantity of money should not be a reason for me not to be able to enjoy some of thepleasures that you rich people do.

Sincerely,

Thomas Stigall
